RE: Reconnaissance Level Characterization Report (RLCR) for Building 664 and T664A - Concurrence

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the RLCR for Building 664 and Trailer 664A, Revision 0 dated October 20, 2004. We received this RLCR on October 26, 2004. Based on the information contained in the RLCR, and revisions provided on October 27, 2004, we are hereby concurring with the determination that B664 and T664A are Type 1 Facilities.

Although we have concurred with the Type 1 determination for B664, as stated in this RLCR and your cover letter dated October 22, 2004, RCRA Unit 20 must be properly closed prior to initiating demolition activities. As stated in your letter the closure of RCRA Unit 20 should be documented in the Closeout Report for B664. As also indicated in your letter we approved the Closure Description Document for Unit 20 in a letter dated August 23, 2004.

In addition, although not addressed in this RLCR, it is our understanding from discussions with Mike Swartz that lead shielding remains in B664 (in the "RTR Chamber" in Room 100). As such, the identification, removal, and disposal of the remaining lead must be properly performed during demolition. Documentation of the disposition of the lead needs to be provided in the Closeout Report for B664.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

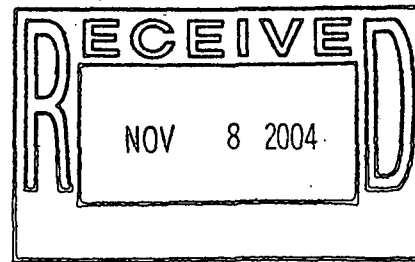

Steven H. Gunderson
